EDUCATION

Virginia Tech

M.E. Computer Science	GPA: 3.80/4.0	Arlington, VA	01/2023 - 05/2025
B.S. Computer Engineering	GPA: 3.43/4.0	Blacksburg, VA	07/2019 - 05/2023

SKILLS

- **Languages:** Go, Python, Kotlin, Java, C/C++, SQL, TypeScript, Bash, LaTeX
- **Cloud & DevOps:** AWS (Lambda, DynamoDB, CDK, CloudWatch, OpenSearch), Docker, Git, CI/CD, Linux
- **Frameworks & Tools:** Django, SpringBoot, Cobra CLI, Celery, PostgreSQL, MongoDB, NumPy, Pandas, TensorFlow, Cloudscape, TanStack, Postman, Guice

EXPERIENCE

- | | | | |
|--|-----------------|---------------|-------------------|
| Software Engineer | <u>AWS</u> | Arlington, VA | 10/2024 - Present |
| <ul style="list-style-type: none">• Contributed to builder productivity initiatives through AWS CDK microservices and IAM-driven tooling.• Designed a Lambda-based ECR Gallery import service that scaled internal repository access from 20 to 1,000+ public repositories, handling 8.4M+ daily pulls from pipeline events and builders.• Built a CloudWatch metrics system for containerized workspace services, providing launch pattern visibility across 2,000+ workspace launches from 471 alpha testers.• Maintained on-call duties for 9+ services, ensuring CI/CD pipeline reliability and supporting tool vendors, 162k+ cloud desktops, and alpha testing initiatives. | | | |
| Software Engineer, Intern | <u>Rubrik</u> | Palo Alto, CA | 05/2024 - 08/2024 |
| <ul style="list-style-type: none">• Orchestrated a feature to automate CI/CD scheduling using Celery's pub/sub model for async task processing, enabling release managers to coordinate deployments across 10+ engineering teams and eliminate scheduling conflicts.• Integrated Google Calendar API with Django backend to provide a single source of truth for all release timelines, improving visibility and self-service, saving hours of developer time.• Gained in-depth knowledge of CI/CD workflows and automation strategies within a Django-Python environment. | | | |
| Tech Fellow, Web Development | <u>Codepath</u> | Arlington, VA | 01/2024 - 05/2024 |
| <ul style="list-style-type: none">• Mentored 20 students, offering technical guidance and career advice on team collaboration, initiative, and velocity.• Built a movie recommendation site using React, Django, and PostgreSQL, implementing JWT auth and RESTful APIs. | | | |
| AI and Security Perception Intern | <u>MITRE</u> | McLean, VA | 08/2021 - 05/2023 |
| <ul style="list-style-type: none">• Developed and refined AI red teaming methodologies, identifying and mitigating vulnerabilities in machine learning models, with an 18% improvement in detection performance using the MMDetection framework.• Engineered synthetic datasets via Unreal Engine and JSON manipulation, expanding test data by 80% and applying adversarial robustness techniques to decrease detection rates by 31% in synthetic environments. | | | |

PROJECTS

- | | |
|---|-------------------|
| Quri - Personal Finance Platform | 10/2025 - Present |
| <ul style="list-style-type: none">• Developing full-stack application using Kotlin/Spring Boot backend with React frontend and NoSQL database• Implementing ETL pipelines for time-series forecasting of user cash flow and OpenSearch for exploratory data analysis | |
| Augmented Reality Transit | 08/2022 - 05/2023 |
| <ul style="list-style-type: none">• Unity-based AR app that visualizes 3D paths from Google Maps API and uses YOLOv5 for hazard detection on HoloLens | |

ORGANIZATIONS

- | | | |
|---|-------------------------|-------------------|
| A. James Clark Scholars Program | Exclusive Cohort Member | 06/2019 - 05/2023 |
| Additionally: Google LSLS, VSGC, ColorStack, Dean's List, VT Global Education Office, Codepath, Research, VT SHPE | | |
